

Mark Six

Conqueror Automatic Electric Spirit Duplicators

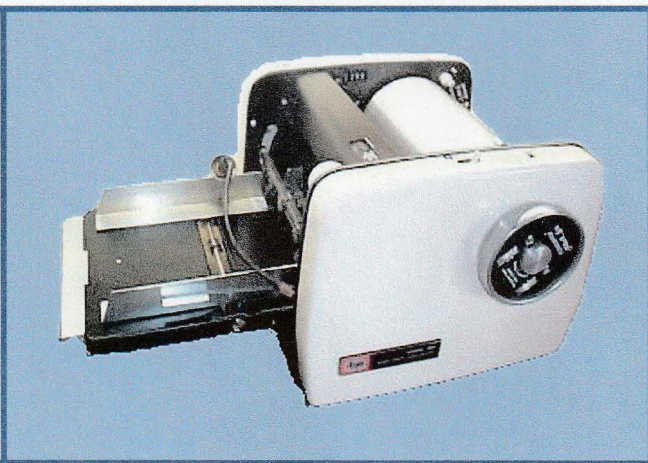

Model 76M

Our most popular model features 250 sheet feed table, copy counter, adjustable feed tension, pressure and fluid controls to get the most from each master. Cylinder stop adjusts for 11" and 14" masters. One quart brass fluid tank. Features Heyer's renowned rugged all-steel construction and clearly marked controls.

Model 76P

New no-flood pump fluid system takes duplicating fluid directly from the can. No more pouring, no more messy spills. One control starts motor, pump and engages roller pressure. Another starts or stops printing. As with all Heyer machines, operating instructions are permanently printed on the receiving tray.

Heyer Inc., Chicago, Illinois, U.S.A.

Manufacturer of quality duplicating equipment since 1903

Always makes a good impression!
